BIOL G4463

Spring 2027

(Class: T/R, 10:30-11:45)

Lake Ecology

Dr. Dave Hambright

Regents' Professor of Biology

An introduction and overview of the field of lake ecology (or more broadly, limnology – the study of inland waters) via classroom lectures and discussions.

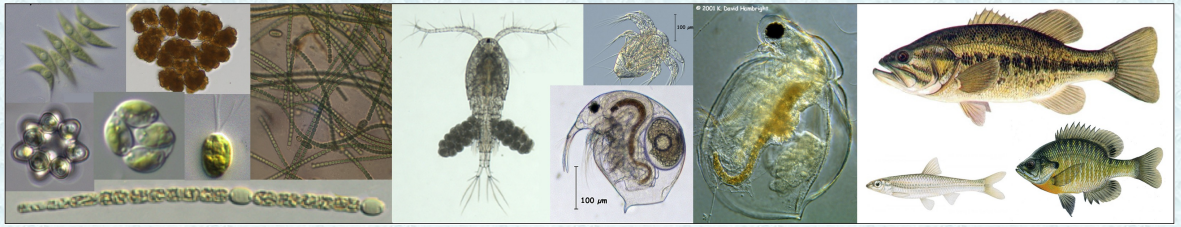

Prerequisite:
BIOL 3403 or permission

Fulfills elective requirements for Biology-IBS and EEOB majors! Available for Grad Credit!!

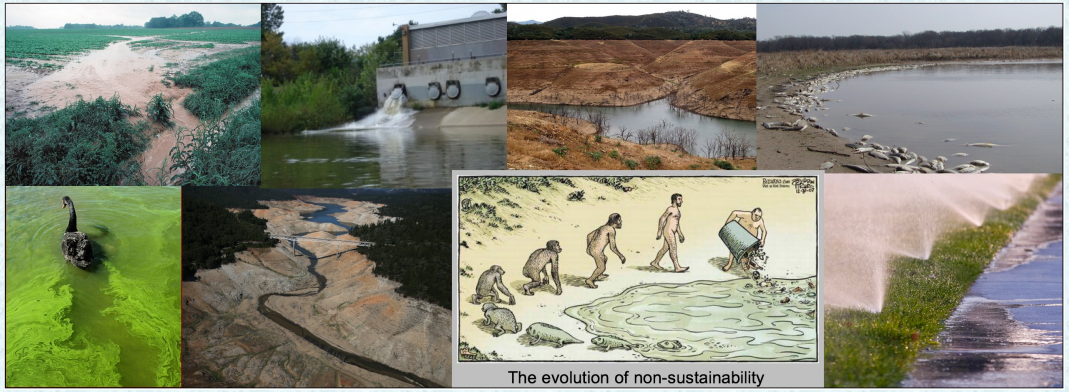

Ever wonder how and why lakes form?

… what lives in your favorite lake?

… where we get our water,

& why it often tastes bad?
